

**A. Change the following fractions into decimals.**

1) $\frac{1}{2} =$

7) $\frac{3}{5} =$

13) $\frac{77}{100} =$

2) $\frac{1}{4} =$

8) $\frac{1}{10} =$

14) $\frac{607}{100} =$

3) $\frac{2}{4} =$

9) $\frac{3}{10} =$

15) $\frac{1}{1000} =$

4) $\frac{3}{4} =$

10) $\frac{10}{10} =$

16) $\frac{21}{1000} =$

5) $\frac{5}{4} =$

11) $\frac{11}{10} =$

17) $\frac{501}{1000} =$

6) $\frac{1}{5} =$

12) $\frac{1}{100} =$

18) $\frac{4001}{1000} =$

B. Change the following decimals into fractions.

• Simplify your answers as far as possible.

• Fractions greater than 1 should be written as improper fractions.

1) $0.4 =$

7) $0.55 =$

13) $1.1 =$

2) $0.8 =$

8) $0.02 =$

14) $1.03 =$

3) $0.05 =$

9) $0.18 =$

15) $0.125 =$

4) $0.7 =$

10) $0.9 =$

16) $1.55 =$

5) $0.04 =$

11) $1.4 =$

17) $1.02 =$

6) $0.84 =$

12) $1.5 =$

18) $1.16 =$
